WELCOME ALUMNAE AND **THANKSGIVING**

Home coming! - Thanksgiving! Whee, it won't be long. Won't it be great to have the old girls back —and what a useful clause "do you remmeber" will be. You'd be surprised at when a number of these young flapper teachers graduatedtake notes in alumnae chapel and soon-if you are a good "math" student you'll know the exact age of your pet teacher-however don't let on that you're interested because she might not be so liberal with her information-would be a good way to make some of the speeches shorter maybe. Just another hint-this especially for the rreshman—if you'll creep up meekly and invocently during one of the alumnae "ball sessions" you won't be important enough to be "shooed" away at that particular moment and you'll certainly get an earful for

Dear people:

Say, who told Prof. McNutt that love was so sweet? If that's his idea of love I'd like to get a lesson on it. And by the way, I spent a whole afternoon down at the Library trying to find some of his short stories and couldn't find a single one. What's wrong with our library?

That's a good idea, Woodja Lactuno, about extending sleeping hours during the winter months, Another good one 'bout the history of the world—with a platform like that and a little "opposition" you could be president of U. S.

I've been waiting all week for some of those Colonnade reporters to interview me 'bout that vital subject of seniors knowing less than freshmen. Since they haven't come around—probably due to lack of time—I shall be forced to give my opinion anyway. After much careful thought, I have decided that the best and most promising solution to the problem in hand would be to work the other way and start the new girls off in the senior class! Another remedy would be to use the figures from intelligence tests as golf scores, thus making the sen-

LOTTIE MOORING CURL, B. S. 1925, GUEST OF HONOR AT CHAPEL FRIDAY

History of The College to Be Feature of The Program

Lottie Mooring Curl chose to work on a history of Georgia State College for Women as her thesis toward her Masters Degree at Peabody. She will tell more in detail about it at Chapel on November 27,

"The purpose of this thesis has been to present a history of the Georgia State College for Women.

The method used has been one of historical research. Practically all the material in the thesis has been Washington, Marion Keith, From drawn from original sources, such as newspapers, acts of the Legislature, Schate and House Journals, Annual Reports of the State Treasurer, the Comptroller General, and the Department of Education, College Catalogs and bulletins, and personal interviews.

> Very few college records were available, due to the destruction of the Administration building by fire, December eightly 1924, and the loss of all records in the offices of the president, bursar, and registrar.

The college was founded by the state for the purpose of giving a moderate means in Georgia. Economy and efficiency combined with enthusiasm for scholarship have been emphasized in administration and instruction, and the rapid growth of the college testified to the popularity of this program.

The history of the college is traced from the introduction of the bill in 1889 to establish it, through the year 1930-1931. An attempt is made to show the expansion of the curriculum, the growth of the material resources of the college, and evolution from a small normal school into the first state college for women in Georgia."

There had been the disappointment about going home; the cool note she had received from Sam; the five semifinal exams in two days; those three added pounds; and now this paper to be handed in tomorrow.

"I've never been so thoroughly disgusted," she told her freshman roommate as she threw her books on the bed.

"Disgusted? About What?" her commate asked pleasantly.

Suc Fann had not meant for anyone to ask her questions, especially unnecessary questions, but you could always count on Sydney to ask questions. She was only trying to be pleasant, Sue Fann knew, but Sydney had had nothing to disgust her beyond words.

"I had never thought of it in that way."

"Why don't you write about the ordinary things you have to be thankful for," asked Sydney as she went whistling out of the room.

Poetry

There are two types of poetry which I shall discuss today—that which can be understood and that which can not. To put yourself in the proper frame of mind for that which can be understood go out and look at a sunset, think of your beaulover, then try to think of what rhymes with love, moon, roses, and you. A few follow:

Love: dove, above, and perhaps, prove, and trove.

Moon: June, tune, soon, boon, strewn, croon, dune.

Rose: those, foes, flows, blows, doze. You: too, few, true, flew, do, new, knew.

As you have probably observed by this time, the poems that can be understood are love poems. The reason for this is simple. Everybody is interested ni love ,and everybody understands a poem which tells anything about this all-important subject. The best scheme to use is a series of quatrians of eight syilable-lines. This keeps the rhythm even and the rhythm work out easily. By all means, put in a line about Cupid's darts, a line about a lover's despair, and end with "I love you."

To write the type that can not be undedstood, all one needs is a pen and paper and a willing mind. No rhyme scheme, rhythm or reason is necessary. There is no unnecessary bother about words. Merely choose a few words with snap, fizz, or excitement in them, land string them in rows. You may write about anything under high Heaven, but always be sure not to mix your | ink. subjects. If you mean to write about onions, don't mix them with garlic. If you write about gardens, don't mix them with houses. It isn't so important to say something, hut the main object is to create an impres-Remember this and you're
